Karaj, Iran

SKILLS

- HTML
- CSS
- SASS
- JavaScript
- React

LANGUAGES

- Persian
- English

HOBBIES

Coding, Reading Books, Listening to Music, Watching Movies, Kickboxing

ABOUT ME - MOTIVES

I was born on 05/24/2003 and it wasn't until my primary school years that I had my first visit with the so called computer. It was so fascinating to me, a tool with unlimited possibilities many of which could change the life of human beings forever. Since my childhood I always used to think that I'm not born to leave a useless life ,but I'm going the experience a rather profitable one. With all that said I believe that this isn't that good of a reason to choose a path and a career that we will be following for the rest of our lives. So when it comes to being both profitable and long term there is only one path for us to choose and that's the one we love the most because that is the only possible way to do something for years and do it as good as possible as the years pass, without ever giving up on our goals and dreams. "Do this and your efforts will be the game changers of many of the lives on this planet" is the one sentence I think that best describes my passion and motivaton when it comes to technology and coding.

My Projects

For a list of my projects make sure to check my personal website.

Personal Traits / Soft Skills

I am ...
- capable of maintaining a friendly atmosphere while respecting teammates and colleagues
- am open to suggestions and criticism that helps me to improve myself and my profession
- eager to learning new skills and technologies each and every day
- a real competitor. I try my best to keep up with others ,but the main goal is to compete with my older versions

EDUCATION

Software Engineering

KIAU - Karaj Islamic Azad University — 2021 - now

I'm a student at KIAU also known as Karaj Islamic Azad University, studying to further expand my knowledge in tech-related fields
